Software Analysis and Development!

Hi, my name is Andrés Felipe Lozada and I study Software Analysis and Development at SENA in Colombia..

I chose this program because I like software development, artificial intelligence, and solving real problems with technology.

Software Development

Databases

Testing

AI

AI

Agile Methods

Teamwork

Program skills

SENA Colombia

In this program I am learning software analysis, application development, databases, testing, teamwork, and agile methods. I also practice creating Full Stack applications and AI projects.

My goal is to become a good software developer and create useful, safe, and innovative solutions. I want to improve my skills and gain experience with real projects for the software industry.
